Abstracts

According to our (Global Info Research) latest study, the global Managed Procurement Services market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

Managed procurement service is a service model that entrusts procurement business to a professional third-party organization for comprehensive management. Managed procurement service providers usually have a professional procurement team with rich procurement experience and expertise. These professionals are familiar with the market conditions, supplier conditions and procurement processes of various materials, and can provide professional procurement suggestions and solutions to the client. For small and medium-sized enterprises, due to the small scale of procurement and limited procurement resources, it is often difficult to obtain preferential prices and high-quality services. Managed procurement services can help small and medium-sized enterprises integrate procurement needs, obtain economies of scale through centralized procurement and other methods, and reduce procurement costs. At the same time, professional procurement teams can provide professional procurement suggestions and solutions for small and medium-sized enterprises to improve procurement efficiency and quality.
