The global Managed VPN market size is expected to reach \$ 49693 million by 2032, rising at a market growth of 9.2% CAGR during the forecast period (2026-2032).

Managed VPN services enable users to manage and monitor their organization's network, and provide a complete view of the network. Service providers help enterprises manage the end points of the network, and notify users whenever a threat is detected. Moreover, enterprises can access a portal where all the activities of the network, such as performance reporting, network health monitoring, service management, and SLA management are reported, which makes management of the network easier. Furthermore, managed services help organizations in the optimum utilization of all the resources, which increases the efficiency of the organization. The global managed VPN gross margin is projected to be approximately 60% by 2025.

The major players in global Managed VPN market include Orange Business Services, AT&T, Verizon Communication, etc. The top 3 players occupy about 35% shares of the global market. North America and Europe are main markets, they occupy about 65% of the global market. Site-to-site VPN is the main type, with a share about 75%. BFSI & Healthcare is the main application, which holds a share about 40%. The global enterprise-grade hosted VPN market is experiencing rapid growth, with the widespread adoption of remote work, cross-border branch offices, and cloud services significantly driving demand for VPNs with high availability, security, and manageability. Large telecommunications and network service providers continue to invest in cloud hosting, SD-WAN, and Secure Access Service Edge (SASE) technologies to meet enterprises' requirements for centralized management and compliance. Meanwhile, the rising demand for flexible, low-cost cloud VPN solutions from the small and medium-sized enterprise (SME) market presents new growth opportunities for vendors. However, the

market still faces risks such as evolving cybersecurity threats, intense competition in service pricing, and cross-border compliance challenges.

This report studies the global Managed VPN demand, key companies, and key regions.
