Abstracts

The global Mancozeb market size is expected to reach \$ 1151 million by 2032, rising at a market growth of 3.2% CAGR during the forecast period (2026-2032).

Ethylenebisdithiocarbamates (EBDCs) are a group of non-systemic (surface acting) fungicides. EBDCs active ingredients approved for use are mancozeb, maneb, zineb and others. The most EBDC usage involves mancozeb. Mancozeb is a grayish-yellow powder with a musty odor which is practically insoluble in water as well as most organic solvents. It is a combination of two other dithiocarbamates: maneb and zineb. The mixture controls many fungal diseases in a wide range of field crops, fruits, nuts, vegetables, and ornamentals. It is marketed as Dithane, Manzeb, Nemispot, and Manzane. In this report, the EBDC is calculated by mancozeb product. It is powder and usually available as concentrated (80%) WP, but the volume of mancozeb is calculated by technical mancozeb.

Global Mancozeb key players include UPL, Dow AgroSciences, Indofil, Coromandel International, Limin Chemical, etc. Global top five manufacturers hold a share about 80%. In terms of application, the largest application is Agricultural, followed by Plantations and Estates, Horticultural and Ornamental Crops, etc.

This report studies the global Mancozeb production, demand, key manufacturers, and key regions.
