According to our (Global Info Research) latest study, the global Manned Atmospheric Diving System (ADS) market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

A manned atmospheric diving system (ADS) is a special piece of equipment used for deep-sea diving, designed to allow divers to work in high-pressure environments without being affected by underwater pressure. Unlike traditional diving methods, ADS keeps the internal air pressure the same as the surface air pressure, allowing divers to move and work freely in deeper waters without having to wear complicated diving suits or use compressed air.
