A manual powder gun is a device used for the application of powder coatings onto various surfaces. It consists of a spray gun which is connected to an electrostatic power supply, and a container which holds the powder coating material. The powder is then charged with electricity and applied to the surface being coated through the use of compressed air. The charged powder particles are attracted to the grounded surface, creating an even and durable coating. Manual powder guns are frequently used in the automotive, aerospace, and furniture industries, among others.
