## Abstracts

According to our (Global Info Research) latest study, the global Manual Roller Shades/Blinds market size was valued at US\$ 7084 million in 2024 and is forecast to a readjusted size of USD 16260 million by 2031 with a CAGR of 12.7% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Manual roller blinds are widely used in various places due to their beautiful and simple appearance, economical and practical, strong and durable structure, etc., especially for small windows and small glass curtain walls. When the roller blind is raised, its volume is very small, so it is not easy to be noticed; when the roller blind fabric is lowered, it can soften the indoor light, avoid the trouble of direct sunlight, and achieve a good sunshade effect. In particular, the white coated fabric can effectively regulate the indoor temperature and reduce carbon emissions. As one of the high-quality and commonly used sunshade products, manual roller blinds have a variety of fabrics for users to choose from to meet different sunshade needs. But they are usually called sunshine fabrics (transparent fabrics) and blackout fabrics.

This report is a detailed and comprehensive analysis for global Manual Roller Shades/Blinds market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets.

Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

### **Key Features:**

Global Manual Roller Shades/Blinds market size and forecasts, in consumption value (\$ Million), sales quantity (K Sqm), and average selling prices (US\$/Sq m), 2020-2031
