The global Manual Torque Multipliers market size is expected to reach \$ million by 2032, rising at a market growth of %CAGR during the forecast period (2026-2032).

Manual Torque Multipliers is a tool used to provide a mechanical advantage in applying torque to turn bolts, nuts or other items designed to be actuated by application of torque, such as the actuation of valves, particularly where there are relatively high torque requirements. Torque multipliers can also be used to ease manual tube expansion in drums of water tube boilers or to expand tubes in restricted space. The manually operated torque multipliers made are ideal for applications without a third-party power source – an effective tool for loosening and tightening bolts that is suitable for use anywhere and at any time.

In Europe market, Manual Torque Multipliers key players include Actuant Corporation, Gedore Tools, Stanley Black & Decker, Norbar, Apex Tool Group, etc. The top five manufacturers hold a share about 45%. Germany is the largest market, with a share about 20%, followed by Russia, with a share about 15 percent. In terms of product, Reaction Plate Multiplier is the largest segment, with a share about 70%. And in terms of application, the largest application is Engineering & Construction, followed by Industrial, Transportation, Manufacturing, etc.
