## Abstracts

According to our (Global Info Research) latest study, the global Marine Circuit Breaker market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes. Marine circuit breakers are electro-mechanical devices specifically designed to protect electrical circuits from overload of current or short circuit. It interrupts the current flow the moment a fault in the flow is detected. It is automatically tripped by the surge of current. Once they have been tripped, they need to be manually reset. The primary benefit of breakers are that they don't need to be replaced after being tripped.
