## Abstracts

According to our (Global Info Research) latest study, the global Marine Communication Systems market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Ceiling is overhead interior portion within the room which covers the upper portion of the room. Main purpose of ceiling is to achieve the desired height of the roof in the room. Ceilings are frequently decorated with attractive paintings, mosaic tiles and other different designs. Major advantage of decorated ceiling is that it gets protected from damage by fingers and dust. There are certain ceilings which are fire resistance; dropping ceiling is one kind of fire resistance ceiling used in the commercial and residential construction.

Ceiling products are mostly used in non residential buildings, where the non residential buildings prefer drywall ceilings, ceiling that can offer sound control properties and allowing easy access to ducts and wiring. Increasing demand from nonresidential building is driving the global ceiling market. Additionally, increasing disposable income has allowed the house owners to spend more on attractive ceiling, which is further expected to drive the global ceiling demand.
