Abstracts

Marine lubricants refer to lubricating oil and lubricating grease that used in marine industry. The use of lubricants and lubricant parameters on ships is an important role managed by the main engine lube oil system. This consists of a pump that pressurizes the oil, circulating it through a set of filters and a cooler before distribution to all the moving components of the diesel engine.

Scope of the Report:

This report focuses on the Marine Cylinder Oil in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The international marine lubricants market has experienced unprecedented transformation in the last few years as changing environmental regulations, more demanding operating conditions, new engine technology, and clients' resulting need for greater support have converged to dramatically alter the context in which lubricant manufacturers and marketers compete. At the same time the shipping industry is in a period of uncertainty as economic recovery remains elusive and shipping rates for some segments depressed.

Global marine cylinder oil market size is expected to register growth at over 2.6% and exceed 1246 K MT till 2023. The marine cylinder oil market is a very concentrated market; the revenue of top ten manufacturers accounts about 90% of the total revenue in 2017. The high-end products mainly come from Europe and USA.

Modernization and maintenance of sea transportation projects has led to the increasing

demand for marine cylinder oil. Increasing sea transportation projects across the globe, especially in the Asia-Pacific is another major factor, driving the growth of the marine cylinder oil market during the forecast period.

With increased focus on sea transportation, the marine cylinder oil market is likely to witness a growth in coming years.

The worldwide market for Marine Cylinder Oil is expected to grow at a CAGR of roughly 2.4% over the next five years, will reach 2890 million US\$ in 2023, from 2510 million US\$ in 2017, according to a new GIR (Global Info Research) study.
