According to our (Global Info Research) latest study, the global Marine Dual-fuel Boiler market size was valued at US\$ 94.8 million in 2024 and is forecast to a readjusted size of USD 194 million by 2031 with a CAGR of 8.5% during review period.

Marine dual-fuel boiler is a boiler that can use two different fuels (usually heavy fuel oil and liquefied natural gas or methanol) at the same time, specially designed for the power and heat needs of ships. Marine dual-fuel boilers are usually designed to be efficient, reliable, and able to work stably in various marine conditions. By using multiple fuels, this type of boiler not only improves the operational efficiency of the ship, but also reduces the environmental impact, in line with the world's growing focus on sustainable shipping.
