Abstracts

Dynamic positioning (DP) is a computer-controlled system to automatically maintain a vessel's position and heading by using its own propellers and thrusters. Position reference sensors, combined with wind sensors, motion sensors and gyrocompasses, provide information to the computer pertaining to the vessel's position and the magnitude and direction of environmental forces affecting its position.

SCOPE OF THE REPORT:

This report focuses on the Marine Dynamic Positioning System in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The expected downturn in the offshore industry and the weakening shipbuilding industry are anticipated to impact the overall marine dynamic positioning system market in the coming years. The deterioration in the market conditions for offshore oil & gas industry and decline in oil prices are some of the reasons that restrain the market growth. In addition, global oversupply, recessions, and change in economic fundamentals limit the growth of the shipbuilding industry.

The growth of the marine dynamic positioning system industry is driven by the growth in offshore windmill installations, increase in the number of offshore patrol vessels, and rise in deployment of research vessels.

Africa is one of the fastest-growing markets for dynamic positioning systems due to increase in the end users of dynamic positioning systems. Africa's economic development was fueled by activities related to extraction of massive energy sources. Due to the presence of a significant number of natural resources, various non-African

companies are willing to contribute towards the development of the African maritime sector.

The worldwide market for Marine Dynamic Positioning System is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
