## Abstracts

The adoption of electric vehicles has increased considerably as they produce lower carbon emissions than fuel-powered vehicles. In addition, scarcity of fuel reserves has shifted the demand for the use of alternative energy sources, which in turn, propels the ships and boats market.

### SCOPE OF THE REPORT:

This report focuses on the Marine Electric Vehicle in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Since the energy crises of the 1970s, interest in this quiet and potentially renewable marine energy source has been increasing steadily again, especially as solar cells became available, for the first time making possible motorboats with an infinite range like sailboats. The first practical solar boat was probably constructed in 1975 in England. The first electric sailboat which made a round-the-world tour, including the through the Panama Canal, with only green technologies is EcoSailingProject.

The worldwide market for Marine Electric Vehicle is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
