Marine Equipment Insurance refers to a specialized branch of marine insurance designed to provide comprehensive indemnity for physical loss or damage to a wide range of maritime assets that are not necessarily classified as commercial vessels. This coverage extends to specialized machinery, scientific instruments, offshore energy structures, and subsea tools used in maritime environments. Unlike standard Hull and Machinery (H&M) insurance, it focuses on the functional utility of the equipment, covering risks such as accidental damage, mechanical breakdown, loss during transit, and 'loss of submersible' during underwater operations. Furthermore, it often incorporates third-party liability to protect against damage caused by the equipment to subsea infrastructure or other vessels.
