Marine heat insulation fire door is a kind of ship accessories, which refers to the fire door used by ships. Marine heat insulation fire doors are mainly cabin fire doors on ships. Marine fire rated doors are made of fire-resistant and heat-insulating materials, which can effectively avoid casualties. In different grades of fire doors, A60 means that the insulating material can be burned for 60 minutes on one side, the temperature on the other side does not exceed 150 degrees, and does not emit harmful smoke. Usually the steel wall is covered with rock wool.
