Marine Navigation Systems consist of Chart Plotter and Electronic Navigation Chart. A Chart plotter is a device used in marine navigation that integrates GPS data with an electronic navigational chart (ENC). The chart plotter displays the ENC along with the position, heading and speed of the ship, and may display additional information from radar, automatic information systems (AIS) or other sensors.

SCOPE OF THE REPORT:

This report studies the Marine Navigation Systems market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Marine Navigation Systems market by product type and applications/end industries.

An electronic navigational chart or ENC is an official database created by a national hydrographic office for use with an Electronic Chart Display and Information System (ECDIS). An electronic chart must conform to standards stated in the International Hydrographic Organization (IHO) Publication S-57 before it can be certified as an ENC. Only ENCs can be used within ECDIS to meet the International Maritime Organisation (IMO) performance standard for ECDIS.
