## Abstracts

According to our (Global Info Research) latest study, the global Marine Pilotage Services market size was valued at US\$ 338 million in 2025 and is forecast to a readjusted size of US\$ 485 million by 2032 with a CAGR of 5.3% during review period.

To address the high risks associated with ship operations in complex sea conditions, narrow channels, and high-density traffic flow, the difficulty of maneuvering large vessels, and the limited port navigation efficiency, maritime pilotage services have emerged. Since the late 19th century, when modern ports developed specialized pilotage systems, maritime pilotage services have made significant progress in ensuring ship navigation safety and efficient port operations. Currently, maritime pilotage services have evolved into a comprehensive service encompassing mandatory pilotage, scheduled pilotage, tugboat berthing and unberthing assistance, and collaboration with ship traffic management systems. These services are widely used in international ocean shipping, coastal and inland waterway navigation, large vessel berthing and unberthing, and dangerous goods vessel entry and exit, significantly improving navigation efficiency and safety.
