According to our (Global Info Research) latest study, the global Marine Plywood Panels market size was valued at USD 760.6 million in 2023 and is forecast to a readjusted size of USD 846 million by 2030 with a CAGR of 1.5% during review period.

Marine plywood is manufactured from durable face and core veneers, with few defects so it performs longer in both humid and wet conditions and resists delaminating and fungal attack. Its construction is such that it can be used in environments where it is exposed to moisture for long periods. Each wood veneer will be from tropical hardwoods, have negligible core gap, limiting the chance of trapping water in the plywood and hence providing a solid and stable glue bond. It uses an exterior Water and Boil Proof (WBP) glue similar to most exterior plywood.

Europe is the largest Marine Plywood Panels market with about 29% market share. China is follower, accounting for about 21% market share.

The key players are UPM Plywood, Potlatch Corporation, SVEZA, Roseburg, Greenply Industries, Mampilly Plywood Industries, Jisheng Tocho, Joubert Plywood, Asia Plywood Company, Samling, Austral Plywoods, Bahar Timber, Van Styn, Anchor Marine Plywood, TaiNuo Plywoods, Consmos etc. Top 3 companies occupied about 30% market share.
