Abstracts

The global Marine Valves and Actuators market size is expected to reach \$ 3315 million by 2032, rising at a market growth of 3.8% CAGR during the forecast period (2026-2032).

Marine valves and actuators are crucial core components of modern ship propulsion systems, power plants, fluid pipelines, and safety control systems. Marine valves are mechanical devices installed in ship piping systems, used to open, close, regulate, or redirect the flow of media. Actuators, which provide automatic or remote power for valve operation, are the foundation of ship automation and intelligent control. In 2024, global Marine Valves and Actuators production reached approximately 2,543 k units, with an average global market price of around US\$ 948 per unit. The production capacity of Marine Valves and Actuators reaches 3,700 k units, and the industry's gross profit margin is approximately between 30% and 50%.

Currently, driven by the global shipbuilding industry's recovery, particularly the growth in orders for high-value-added vessels such as LNG carriers and container ships, the new shipbuilding market's demand for valves and actuators remains robust. At the same time, the International Maritime Organization's (IMO) increasingly stringent environmental regulations have directly spurred a massive demand for new shipbuilding and existing ship modifications, significantly boosting demand for corrosion-resistant valves and supporting actuators.

In the future, the marine valve and actuator industry will continue to develop along the path of intelligence, greening, and localization. The deep integration of intelligent digital actuators and valves will enable remote monitoring and predictive maintenance, becoming a key component of smart ships. Demand for ultra-low-temperature, high-

reliability specialty valves suitable for clean energy sources such as LNG and ammonia will grow rapidly. Furthermore, modular and integrated designs will optimize manufacturing and installation processes, driving the industry towards efficient, safe, and sustainable development.
