Scope of the Report:

This report focuses on the Maritime Fenders (Marine Fender) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

As for the global Marine Fender industry, the most production value share is led by several giants. The giant Trelleborg, which has 11.43% market share in 2016, is the leader in the Marine Fender industry, followed by Bridgestone and Sumitomo Rubber. In America and Europe market, mergers and acquisitions is the mainstream, which is an indicator for the maturity of this regional market. Asia market is led by Japanese manufacturers, along with the main ship building industry in Japan, Korea and China, however, industry transfer is obvious from Japan to China and other southeast countries, like Indonesia.

China Marine Fender industry has developed quickly in the past ten years, along with port infrastructure, ship building industry and high level import & export activities. Matured rubber related industry, a complete supply chain and huge consumption market, are all factors that witnessed this development.

Natural rubber price is at rather low level currently and is forecasted to be unsustainable. Players in this industry should pay attention to the price fluctuation and try to enhance market position before the raw material price rise again.

Although sales of Marine Fender products bring a lot of opportunities, the study group

recommends the new entrants who just have money but without technical advantage, raw materials advantage and downstream support, do not enter into the Marine Fender field hastily.

The worldwide market for Maritime Fenders (Marine Fender) is expected to grow at a CAGR of roughly 2.4% over the next five years, will reach 970 million US\$ in 2023, from 840 million US\$ in 2017, according to a new GIR (Global Info Research) study.
