According to our (Global Info Research) latest study, the global Maritime Logistics Services market size was valued at US\$ 1588 million in 2025 and is forecast to a readjusted size of US\$ 2262 million by 2032 with a CAGR of 5.2% during review period.

To address the problems of low transportation efficiency, lack of information transparency, weak risk management, and high cross-border coordination costs in traditional maritime transport, maritime logistics services have emerged. Since the containerization revolution of 1956 ushered in modern maritime logistics, this service has achieved a paradigm shift from 'bulk cargo consolidation' to 'end-to-end digital supply chain' through standardized container transport, global port network collaboration, digital logistics platforms, and intelligent ship technology. It is widely used in a comprehensive professional service system in international trade, energy transportation, cross-border e-commerce, automobile exports, and cold chain logistics.
