## Abstracts

The global Mast Cell Stabilizer Eye Drops market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The global market for mast cell stabilizers is primarily driven by the rising prevalence of allergic diseases across the globe. Allergy is a major health problem affecting a large population and the need for effective treatment options remains high. Factors such as environmental pollution, changing dietary pattern, and genetic predisposition lead to rising incidence of allergies, thereby stimulating the demand for mast cell stabilizers. Mast-cell stabilizers are thought to prevent calcium influx across mast-cell membranes, thereby preventing mast-cell degranulation and mediator release.
