According to our (Global Info Research) latest study, the global Mast Cell Stabilizer market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes. The global market for mast cell stabilizers is primarily driven by the rising prevalence of allergic diseases across the globe. Allergy is a major health problem affecting a large population and the need for effective treatment options remains high. Factors such as environmental pollution, changing dietary pattern, and genetic predisposition lead to rising incidence of allergies, thereby stimulating the demand for mast cell stabilizers. Mast-cell stabilizers are thought to prevent calcium influx across mast-cell membranes, thereby preventing mast-cell degranulation and mediator release.
