## Abstracts

According to our (Global Info Research) latest study, the global Material Jetting (MJ) market size was valued at USD 96.7 million in 2023 and is forecast to a readjusted size of USD 134.2 million by 2030 with a CAGR of 4.8% during review period.

Material jetting is the equipment which could mold materials with material jetting technology. Material jetting has the added advantage of being able to 3D print using multiple materials at once. Objects can be produced with a variety of materials as well as customize the specific area where those materials are placed. This eliminates the need to print separate layers of different materials and assemble them later. In a single run, one can produce complete products with parts made from separate materials.

Global Material Jetting (MJ) main players are Stratasys, 3D Systems, HP, Vader Systems etc. Global top four manufacturers hold a share over 90%. North America is the largest market, with a share nearly 60%.
