The global Matrix Converter market size is expected to reach \$ 807.1 million by 2029, rising at a market growth of 3.8% CAGR during the forecast period (2023-2029).

In the global market, the core manufacturers of Matrix Converters are Yaskawa and Fuji Electric, with the top two companies in the industry accounting for more than 99% of the market share. North America, Europe, Japan, and China are the main production regions for this product, and they all occupy about 20% of the global market share. The product is categorised into low voltage converters and medium voltage converters based on the product type. The products are widely used in general machinery, HVAC and compressors, cranes and hoists, pumps and fans, oil and gas, new energy and other industries.

Matrix Converter is defined as a converter with a single stage of conversion. It utilizes bidirectional controlled switch to achieve automatic conversion of power from AC to AC. It provides an alternative to PWM voltage rectifier doublesided.

Currently, only Yaskawa and Fuji Electric have commercially produced Matrix Converter products. Manufacturers like ABB believe that the MC technology is attractive, but it requires more research before it can be fully explored for industrial applications.
