## Abstracts

According to our (Global Info Research) latest study, the global Mattress market size was valued at US\$ 43110 million in 2024 and is forecast to a readjusted size of USD 63130 million by 2031 with a CAGR of 5.7% during review period.

A mattress is a large pad for supporting the reclining body, used as or on a bed. Mattresses may consist of a quilted or similarly fastened case, usually of heavy cloth, that contains hair, straw, cotton, foam rubber, etc.; a framework of metal springs; or they may be inflatable.

Mattresses are usually placed on top of a bed base which may be solid, as in the case of a platform bed, or elastic, e.g. with an upholstered wood and wire box spring or a slatted foundation. Flexible bed bases can prolong the life of the mattress. Popular in Europe, a divan incorporates both mattress and foundation in a single upholstered, footed unit. Divans have at least one innerspring layer as well as cushioning materials. They may be supplied with a secondary mattress and/or a removable 'topper.'

Global Mattress key players include Serta Simmons Bedding, Tempur Sealy International, etc. Global top two manufacturers hold a share about 20%.

North America is the largest market, with a share about 30%, followed by Europe and China, both have a share about 45 percent.

In terms of product, Innerspring mattress is the largest segment, with a share about 50%. And in terms of application, the largest application is Private Households, followed by Hotels, Hospitals, etc.
