Abstracts

The global MBBR System market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

MBBR stands for Moving Bed Biofilm Reactor. It is a wastewater treatment process that utilizes a biofilm attached to a moving bed of specially designed plastic media to remove organic and inorganic pollutants from water. In an MBBR system, microorganisms grow and attach themselves to the surface of the media. As the media bed moves continuously, the microorganisms consume and degrade organic matter and pollutants present in the wastewater. This biofilm community forms a layer of active bacteria that effectively treats the water.
