Abstracts

The global MC Nylon market size is expected to reach \$ 668 million by 2032, rising at a market growth of 3.8% CAGR during the forecast period (2026-2032).

In 2025, global MC Nylon sales reached approximately 94.47 Kilotons, with an average global market price of around 5,231 USD per Ton.

MC nylon also known as monomer casting nylon, is a product made by mixing caprolactam, a raw material of NYLON6, with a catalyst and polymerized and molded under atmospheric pressure. It is chemically same as NYLON6, but it has high molecular weight and crystallinity and excellent properties such as mechanical properties, self-lubricating, abrasion resistance, chemical resistance, and corrosion resistance. Due to these outstanding features, it is an excellent material that can be used to replace metal parts in various industries.

The gross profit margin of MC nylon is generally between 30% and 45%, depending on production scale, raw material costs, and the industry in which the product is applied. For standard MC nylon (Nylon 6), the gross profit margin is relatively low due to widespread market demand and intense price competition; while for high-performance reinforced monomer-cast nylon, the gross profit margin is higher due to its advantages in requiring higher mechanical strength and wear resistance. The production chain of monomer-cast nylon mainly includes upstream raw material supply (such as caprolactam), midstream casting and processing, and downstream application areas. Upstream suppliers are responsible for providing nylon monomers and reinforcing materials, the midstream involves casting, molding, processing, and customization services for monomer-cast nylon, and the downstream includes component suppliers in industries such as machinery, automotive, and electronics. With the increasing demand

for high-performance, durable materials across various industries, the market demand for monomer-cast nylon is also gradually increasing, especially in the fields of mechanical parts, automotive parts, and high-end equipment.

Market Development Opportunities & Main Driving Factors

As global manufacturing upgrades, the market for MC Nylon is presenting more and more opportunities. Firstly, with the rise of industrial automation and smart manufacturing, many traditional metal materials are being replaced by MC Nylon, particularly in applications that require high strength and wear resistance. Secondly, the automotive industry's growing demand for lightweight, environmentally friendly, and durable components is driving the widespread application of MC Nylon in automotive parts, especially as electric vehicles (EVs) increase in popularity, further boosting demand. Lastly, with the tightening of environmental regulations, MC Nylon, as a recyclable engineering plastic, aligns with the trend of green manufacturing, making it an ideal alternative to metals and traditional materials across various industries.

Market Challenges, Risks & Restraints

Despite the promising growth prospects for the MC Nylon market, there are challenges. First, the uncertainty in raw material prices, particularly the fluctuation of nylon monomer prices (such as caprolactam), may affect the production costs of MC Nylon, thereby impacting profit margins. Secondly, intense competition exists in the global market, particularly with the pressure from low-cost manufacturers, which could lead to price wars and reduce profitability. Moreover, although MC Nylon offers excellent mechanical properties, its performance in extreme environments (such as very high or low temperatures) may not match other high-performance materials like metals or ceramics. Therefore, continuous product innovation and research and development are necessary to maintain competitiveness in the market.

Downstream Demand Trends

As industries continue to demand high-performance and high-strength materials, the downstream demand for MC Nylon is becoming increasingly diversified. The automotive industry's need for lightweight and high-wear-resistant components has driven the use of MC Nylon in automotive parts, such as electric vehicle components, transmission systems, and seat parts. At the same time, the miniaturization of electronic products and the widespread adoption of industrial automation are expanding the use of MC Nylon in electronic housings and precision mechanical components. Particularly in the

Asia-Pacific region, with the rapid development of manufacturing industries, the demand for MC Nylon has significantly increased and is expected to continue driving the market in the coming years. Additionally, the tightening of environmental regulations is making MC Nylon a key material in sustainable manufacturing and eco-friendly equipment, further increasing market demand.

This report studies the global MC Nylon production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for MC Nylon and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of MC Nylon that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global MC Nylon total production and demand, 2021-2032, (Kilotons)

Global MC Nylon total production value, 2021-2032, (USD Million)

Global MC Nylon production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (Kilotons), (based on production site)

Global MC Nylon consumption by region & country, CAGR, 2021-2032 & (Kilotons)

U.S. VS China: MC Nylon domestic production, consumption, key domestic manufacturers and share

Global MC Nylon production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (Kilotons)

Global MC Nylon production by Type, production, value, CAGR, 2021-2032, (USD Million) & (Kilotons)

Global MC Nylon production by Application, production, value, CAGR, 2021-2032, (USD Million) & (Kilotons)

This report profiles key players in the global MC Nylon market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Mitsubishi Chemical Advanced Materials, Röchling, Cast Nylons Limited (CNL), Licharz, Nylacast Engineered Products, Ensinger, Zell Materials (Klepsch Group), Westley Plastics, Mitsuboshi Belting, Castor Plastics, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World MC Nylon market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (Kilotons) and average price (US\$/Ton) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

7.3.2 World MC Nylon Production Value by Type of Nylon (2021-2032)

7.3.3 World MC Nylon Average Price by Type of Nylon (2021-2032)

8 MARKET ANALYSIS BY TEMPERATURE RESISTANCE

8.1 World MC Nylon Market Size Overview by Temperature Resistance: 2021 VS 2025 VS 2032

8.2 Segment Introduction by Temperature Resistance

8.2.1 Standard

8.2.2 High-Temperature

8.2.3 Low-Temperature

8.3 Market Segment by Temperature Resistance

8.3.1 World MC Nylon Production by Temperature Resistance (2021-2032)

8.3.2 World MC Nylon Production Value by Temperature Resistance (2021-2032)

8.3.3 World MC Nylon Average Price by Temperature Resistance (2021-2032)

9 MARKET ANALYSIS BY APPLICATION

9.1 World MC Nylon Market Size Overview by Application: 2021 VS 2025 VS 2032

9.2 Segment Introduction by Application

9.2.1 Automotive Industry

9.2.2 Electrical & Electronics

9.2.3 Mechanical Manufacturing

9.2.4 Transportation Industry

9.2.5 Others

9.3 Market Segment by Application

9.3.1 World MC Nylon Production by Application (2021-2032)

9.3.2 World MC Nylon Production Value by Application (2021-2032)

9.3.3 World MC Nylon Average Price by Application (2021-2032)
