The global MC4 Photovoltaic Connector market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

MC4 Photovoltaic Connector is a single-contact electrical connector commonly used for connecting solar panels. The MC in MC4 stands for the manufacturer Multi-Contact (now St?ubli Electrical Connectors) and the 4 for the 4 mm diameter contact pin.

- The upstream industry chain of MC4 Photovoltaic Connector consists of the production of polysilicon, wafers, cells and modules for crystalline silicon (c-Si) PV, which made up 84% of the U.S. market in 2020, or the production of cadmium telluride (CdTe) thin film PV, which made up the remaining 16%. The upstream industry chain also includes the manufacturing of other components such as junction boxes, cables, connectors and inverters.

- The downstream industry chain of MC4 Photovoltaic Connector consists of the installation, operation and maintenance of solar PV systems for various applications such as residential, commercial, industrial and utility-scale. The downstream industry chain also involves the distribution, financing and policy support of solar PV projects.
