Abstracts

The global MCP Server Infrastructure Platforms Software market size is expected to reach $ 1298 million by 2032, rising at a market growth of 6.0% CAGR during the forecast period (2026-2032).

A category of software platforms known as MCP server infrastructure platforms software provides standardized tool invocation and external system connectivity for AI agents and large language model applications. It essentially acts as the "operating system" and "management foundation" between AI and the digital world, exposing diverse infrastructure resources such as databases, APIs, cloud services, and SaaS applications to AI models in a secure, controllable, and observable manner—through building, deploying, operating, and managing MCP servers. Its core value lies in offering development frameworks and hosting environments, centralized security governance (e.g., authentication, authorization, and auditing), service discovery and registration, and full-lifecycle operations management capabilities. This solves AI silo issues and enables AI to securely and efficiently operate real?world tools and systems, serving as the standardized interface layer that connects intelligence with infrastructure in the era of AI agents.

Currently, the market for mcp server infrastructure platforms software is at a critical stage transitioning from proof-of-concept to large-scale deployment. As AI agent technologies penetrate deeply into various industries, the demand for standardized, secure, and governable tool?calling infrastructure becomes increasingly urgent. This field is showing trends toward platformization and integration, with a diverse range of solutions emerging across development frameworks, hosting services, security gateways, service catalogs, and more. Meanwhile, technical architectures are evolving toward stateless, lightweight, and edge?native deployments to reduce operational

complexity and improve responsiveness. The overall competitive landscape remains fluid, with ecosystem collaboration and joint standardization efforts becoming the main themes, driving the connection between AI and real?world systems toward maturity and best practices.

Report Scope

This report studies the global MCP Server Infrastructure Platforms Software demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for MCP Server Infrastructure Platforms Software, and provides market size (US$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of MCP Server Infrastructure Platforms Software that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global MCP Server Infrastructure Platforms Software total market, 2021-2032, (USD Million)

Global MCP Server Infrastructure Platforms Software total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: MCP Server Infrastructure Platforms Software total market, key domestic companies, and share, (USD Million)

Global MCP Server Infrastructure Platforms Software revenue by player, revenue and market share 2021-2026, (USD Million)

Global MCP Server Infrastructure Platforms Software total market by Type, CAGR, 2021-2032, (USD Million)

Global MCP Server Infrastructure Platforms Software total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global MCP Server Infrastructure Platforms Software market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Willow, K2View, CData Connectors, Mintlify, Composio, Data Apps Technologies, Glama, ZoomInfo, Quartex Software, Keet, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world MCP Server Infrastructure Platforms Software market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
