According to our (Global Info Research) latest study, the global Meat Food Safety Testing market size was valued at US\$ 1123 million in 2024 and is forecast to a readjusted size of USD 1787 million by 2031 with a CAGR of 6.9% during review period.

The meat food safety testing market encompasses the testing and analysis of meat and meat products to ensure their safety and compliance with regulatory standards. The testing is conducted to detect and prevent contamination by pathogens, chemicals, toxins, or other hazards that can pose risks to human health.

The market for meat food safety testing has witnessed growth in recent years due to increasing consumer awareness about food safety, the implementation of stringent food safety regulations, and the need for quality assurance in the meat industry. Food safety testing helps to identify potential risks and maintain the integrity and safety of meat products throughout the supply chain.

Meat food safety testing can include various types of tests, such as microbiological testing, chemical residue testing, allergen testing, and genetic testing. Microbiological testing focuses on detecting harmful bacteria, such as Salmonella, Escherichia coli (E. coli), Campylobacter, and Listeria, which are common contaminants in meat products. Chemical residue testing involves screening for the presence of antibiotics, pesticides, heavy metals, and other potentially harmful substances. Allergen testing is performed to identify the presence of allergenic ingredients, such as gluten or specific proteins. Genetic testing is used to verify the authenticity and species identification of meat products.

The global meat food safety testing market is influenced by factors such as food safety regulations and standards set by government authorities, consumer demand for safe and quality meat products, and the increasing globalization of the meat industry. Regulatory bodies and agencies play a crucial role in setting guidelines and monitoring compliance within the industry.

Key players in the meat food safety testing market include food testing laboratories, contract research organizations (CROs), and companies specializing in food safety testing services. Some prominent companies in this space include SGS SA, Eurofins Scientific SE, Bureau Veritas S.A., Intertek Group PLC, and ALS Limited, among others. These companies provide a range of testing services to ensure the safety and quality of meat and meat products.
