Abstracts

The global Meat Food Safety Testing market size is expected to reach $ 1901 million by 2032, rising at a market growth of 6.9% CAGR during the forecast period (2026-2032).

Meat Food Safety Testing refers to the systematic detection, analysis and evaluation of raw livestock/poultry meat, processed meat products and meat derivatives to identify microbial pathogens, veterinary drug residues, heavy metals, adulteration, species fraud and other safety hazards. Relying on technologies such as microbial culture, chromatography-mass spectrometry, immunoassay, molecular biology and spectral sensing, the testing covers the whole industrial chain from breeding, slaughtering, processing, distribution to retail, so as to verify compliance with food safety standards, prevent foodborne diseases, safeguard meat quality authenticity and protect consumer health and legitimate rights.

The market for meat food safety testing has witnessed growth in recent years due to increasing consumer awareness about food safety, the implementation of stringent food safety regulations, and the need for quality assurance in the meat industry. Food safety testing helps to identify potential risks and maintain the integrity and safety of meat products throughout the supply chain. Meat food safety testing can include various types of tests, such as microbiological testing, chemical residue testing, allergen testing, and genetic testing. Microbiological testing focuses on detecting harmful bacteria, such as Salmonella, Escherichia coli (E. coli), Campylobacter, and Listeria, which are common contaminants in meat products. Chemical residue testing involves screening for the presence of antibiotics, pesticides, heavy metals, and other potentially harmful substances. Allergen testing is performed to identify the presence of allergenic ingredients, such as gluten or specific proteins. Genetic testing is used to verify the authenticity and species identification of meat products. The global meat food safety

testing market is influenced by factors such as food safety regulations and standards set by government authorities, consumer demand for safe and quality meat products, and the increasing globalization of the meat industry. Regulatory bodies and agencies play a crucial role in setting guidelines and monitoring compliance within the industry. Key players in the meat food safety testing market include food testing laboratories, contract research organizations (CROs), and companies specializing in food safety testing services. Some prominent companies in this space include SGS SA, Eurofins Scientific SE, Bureau Veritas S.A., Intertek Group PLC, and ALS Limited, among others. These companies provide a range of testing services to ensure the safety and quality of meat and meat products.

Report Scope

This report studies the global Meat Food Safety Testing demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Meat Food Safety Testing, and provides market size (US$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Meat Food Safety Testing that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Meat Food Safety Testing total market, 2021-2032, (USD Million)

Global Meat Food Safety Testing total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Meat Food Safety Testing total market, key domestic companies, and share, (USD Million)

Global Meat Food Safety Testing revenue by player, revenue and market share 2021-2026, (USD Million)

Global Meat Food Safety Testing total market by Type, CAGR, 2021-2032, (USD Million)

Global Meat Food Safety Testing total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Meat Food Safety Testing market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include SGS SA, Eurofins Scientific SE, Intertek Group plc, Bureau Veritas SA, TÜV SÜD AG, ALS Limited, AsureQuality Limited, Romer Labs, 3M, PerkinElmer Inc., etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Meat Food Safety Testing market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
