Abstracts

Advances will be driven by population gains; increased meat, poultry, and seafood production; and export opportunities. In addition, demand will be supported by continued favorable growth for prepared foods, items in smaller and more convenient sizes, and packaging formats that make food preparation easier and faster. Demographic trends such as smaller household sizes, expanding elderly population, and high numbers of households where all adults work will strengthen demand for single portion and other smaller-sized products, as well as processed and ready-to-eat convenience oriented products.

Scope of the Report:

This report focuses on the Meat Poultry and Seafood Packaging in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The significant shift to case-ready pack-aging among grocery retailers as a means to reduce labor costs and reduce food waste will also drive value gains, as case-ready formats typically utilize more costly trays and high barrier films. Additional underlying growth factors will be the importance of packaging in the merchandising of protein products, and the need for packaging designed to provide longer shelf life and user friendliness in terms of preparation, resealability, and storage.

The worldwide market for Meat Poultry and Seafood Packaging is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
