Meat processing conveyor is an automated transportation device specifically designed for the meat processing industry. It transports meat raw materials from one stage of the processing line to another, continuously or intermittently, significantly enhancing production efficiency. Composed of a conveyor belt, drive unit, supporting structure, and control system, it accommodates various sizes, shapes, and weights of meat products. The conveyor belt is made of food-grade materials to ensure no contamination or damage to product quality during contact with meat. Widely applied in slaughtering, cutting, packaging, and other processing stages, it optimizes production lines for efficient, hygienic, and automated modern meat processing.
