Mechanized irrigation systems are equipment comprising various mechanical components such as trusses, spans, towers, drivetrains and others. These irrigation systems offer high efficiency and are useful majorly in larger landscapes. The market for mechanized irrigation systems is highly driven by the rising adoption of automation and mechanization in the agriculture sector.

Scope of the Report:

This report focuses on the Mechanized Irrigation Systems in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The market for mechanized irrigation systems is highly driven by the rising adoption of automation and mechanization in the agriculture sector.

Another major factor boosting mechanized irrigation systems market is superior advantages of these systems over conventional irrigation methods. Additionally, mechanized irrigation systems are convenient for use and help easily irrigate large agricultural fields. Additionally, since the water is applied with better precision, using these systems enhances the yields. However, the market is largely hampered due to lack of awareness and relatively high initial costs of these systems.

The mechanized irrigation systems market is consolidated in nature and is dominated by few major players. Majority of the players are located in North America making the region highly competitive and the largest market. North America and Europe are prime regions with strong penetration of mechanized irrigation systems. Thus, most of the players focus on providing enhanced products so as to gain competitive advantage. Companies are now focusing towards providing cost-effective systems in countries such

as China, India, Brazil and others in order to expand their geographical reach. The worldwide market for Mechanized Irrigation Systems is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
