Media resource integration services refer to professional service agencies that represent brands in communicating, planning, and executing advertising campaigns with various media platforms (TV stations, outdoor advertising, radio, magazines, websites, apps, social media, short video platforms, etc.). Their core task is to help brands use the right money, at the right time, to deliver advertisements to the right people. They typically handle media strategy development (which media to use, which audiences to reach), media mix and scheduling planning, ad placement negotiation and purchase, campaign monitoring and performance evaluation, and sometimes even integrate data platforms for audience insights and campaign optimization. For brands, a brand media communication agency is essentially an 'outsourced media department + campaign think tank,' helping to improve communication efficiency, reduce trial-and-error costs, and obtain better rate card discounts and exposure through professional negotiation and resource integration.
