According to our (Global Info Research) latest study, the global Medical Absorbable Collagen Sutures market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Sutures are fibers, filaments, or thread-like materials used to hold tissue or a wound together. In surgical terms, sutures are used for apposition – that is, the placing (of tissue) side by side to allow healing. Sutures provide tensile support for wounds until the healing tissue has regained sufficient strength to exist without the sutures. Medical absorbable collagen sutures are made of animal-derived materials and can be absorbed by the human body.
