According to our (Global Info Research) latest study, the global Medical Adhesives market size was valued at US\$ 606 million in 2025 and is forecast to a readjusted size of US\$ 923 million by 2032 with a CAGR of 6.3% during review period.

Medical adhesives are adhesives specially designed for medical purposes, usually used to firmly adhere materials (such as dressings, equipment or other medical devices) to skin or biological tissues. They are non-toxic, anti-allergic, strong and can maintain adhesion in a wet environment. They are widely used in wound care, surgical fixation, bandages, medical device adhesion and other fields.

With the advancement of medical technology and the continuous improvement of people's requirements for medical health, the medical adhesives market has experienced significant growth in recent years. As an important medical material, medical adhesives are widely used in many fields such as trauma care, surgical dressings, implant device fixation, skin adhesion, wound sealing, etc.

At the application level, the advantages of medical adhesives are that they are non-invasive, fast, and reduce the risk of infection. Taking trauma care as an example, traditional suturing methods often require a long recovery period and have a certain risk of infection. Medical adhesives can better control infection and accelerate wound healing by sealing the wound in a non-invasive way. In addition, with the development of modern medical equipment and technology, medical adhesives have also been increasingly widely used in surgery, device fixation, and implant connection. In particular, in minimally invasive surgery, medical adhesives are used as tissue fixation and closure tools.

Global key players of Medical Adhesives include Johnson & Johnson, Integra LifeSciences, Medtronic, B. Braun, Stryker, etc. The top five players hold a share over 65%. North America is the largest market, which has a share about 57%, followed by Europe and China with a market share of 28% and 7%, respectively. In terms of product type, Cyanoacrylate Adhesive is the largest segment, occupied for a share of 66%. And in terms of application, Hospital is the largest segment, which has a share about 61%.
