Abstracts

Medical billing is a payment practice within health system. The process involves a healthcare provider submitting, and following up on, claims with health insurance companies in order to receive payment for services rendered; such as treatments and investigations. The same process is used for most insurance companies, whether they are private companies or government sponsored programs. Medical coding reports what the diagnosis and treatment were, and prices are applied accordingly.

SCOPE OF THE REPORT:

This report studies the Medical Billing market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Medical Billing market by product type and applications/end industries.

Many software companies have arisen to provide medical billing software to this particularly lucrative segment of the market. Several companies also offer full portal solutions through their own web-interfaces, which negates the cost of individually licensed software packages. Due to the rapidly changing requirements by U.S. health insurance companies, several aspects of medical billing and medical office management have created the necessity for specialized training.
