Medical cold compress headband is a medical device used for cold compress treatment of the head. The main principle is to reduce the temperature of the head by cooling it, thereby alleviating symptoms such as headaches, dizziness, and fever. A medical cold compress headband usually consists of two parts: a headband and a cold compress tablet, which can be cooled by freezing or soaking in cold water. When using, place a cold compress on the headband, and then fix the headband on the head to achieve cold compress treatment for the head. Medical cold compress headbands are suitable for relieving symptoms such as head pain, dizziness, and fever, and are commonly used in homes, hospitals, and other places.
