According to our (Global Info Research) latest study, the global Medical Collagen Membrane market size was valued at US\$ 275 million in 2024 and is forecast to a readjusted size of USD 418 million by 2031 with a CAGR of 6.2% during review period.

Medical Collagen Membrane is a biocompatible, resorbable material derived from purified collagen, typically sourced from bovine or porcine. It is widely used in medical and dental procedures, particularly in guided tissue regeneration (GTR) and guided bone regeneration (GBR). The membrane acts as a barrier to prevent soft tissue invasion into bone defects, allowing bone or tissue to regenerate undisturbed. Its properties include high biocompatibility, biodegradability, and the ability to support cell attachment and tissue integration. Medical collagen membranes are commonly used in periodontal therapy, implantology, and wound healing applications.
