Medical digital pendant systems are integrated medical devices that combine the Internet of Things (IoT), intelligent sensing, and data interaction technologies. Building upon traditional pendant systems, they integrate equipment status self-diagnosis, remote monitoring, environmental monitoring, and data interaction functions, enabling interconnection and intelligent management of equipment in operating rooms and ICUs, thereby improving clinical operational efficiency and medical safety.

Upstream industries primarily include suppliers of core components such as intelligent sensors, IoT modules, medical gas terminals, electric lifting mechanisms, aluminum alloy profiles, and human-machine interfaces. Downstream industries encompass modern operating rooms, smart ICUs, integrated digital surgical centers, and high-end hospitals, utilizing medical equipment procurement through bidding, smart healthcare system integration, and distributor distribution to serve scenarios such as clinical equipment management, environmental monitoring, and surgical data acquisition. The global unit price of a medical digital pendant is US\$17,488, with annual sales of approximately 15,600 units, a global production capacity of 20,000 units, and an industry profit margin of 20%.
