Medical data storage includes vendor neutral archives (VNA) and image exchange (IE). Vendor neutral archives (VNA) is a medical imaging technology helps to stores images in a standard format and interface, making medical imaging data accessible through different picture archiving and communication systems (PACS). Medical enterprise data storage solutions allow users to consolidate, standardize and archive images and data from different PACS into a single module. Medical enterprise data storage solutions helps to reduce storage capacity dedicated to individual PACS systems and facilitate cross-document sharing and exchange.
