According to our (Global Info Research) latest study, the global Medical Enterprise Data Storage market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Medical data storage includes vendor neutral archives (VNA) and image exchange (IE). Vendor neutral archives (VNA) is a medical imaging technology helps to stores images in a standard format and interface, making medical imaging data accessible through different picture archiving and communication systems (PACS). Medical enterprise data storage solutions allow users to consolidate, standardize and archive images and data from different PACS into a single module. Medical enterprise data storage solutions helps to reduce storage capacity dedicated to individual PACS systems and facilitate cross-document sharing and exchange.

According to our research, the global market for medical devices is estimated at US$ 603 billion in the year 2023, and will be growing at a CAGR of 5% during next six years. The global healthcare spending contributes to occupy 10% of the global GDP and is continuously rising in recent years due to the increasing health needs of the aging population, the growing prevalence of chronic and infectious diseases and the expansion of emerging markets. The medical devices market plays a significant role in the healthcare industry.
