Medical equipment OEM (Original Equipment Manufacturing) and ODM (Original Design Manufacturing) are two important cooperation models in the field of medical equipment manufacturing. Medical equipment OEM refers to a cooperation mode in which medical equipment brand manufacturers entrust professional manufacturers to carry out product research and development and manufacturing, and use the brand manufacturer's own trademarks for sales or operation. Medical equipment ODM refers to the whole process of manufacturers carrying out product research and development, design, manufacturing, and providing post-maintenance services according to customer needs. Customers only need to put forward product functions, performance requirements or product ideas, and manufacturers can turn products from ideas into reality. They each have their own characteristics and complementary advantages, providing enterprises with diverse choices and flexibility.
