## Abstracts

According to our (Global Info Research) latest study, the global Medical Examination Table Paper market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The medical examination table paper market is expected to grow over the next few years driven by the increasing number of medical facilities across the globe. The rising number of illnesses, infections, and accidents has led to an all-time high demand for paper used in medical exam tables. Paper for medical examination tables is used in various medical institutions such as hospitals, clinics, and outpatient surgery centers for patient examination, diagnosis, and treatment. Furthermore, the global medical examination table paper market is expected to grow owing to the increasing use of electronic health records (EHR) in healthcare institutions. EHR systems require high-quality paper for medical examination tables to print medical records, which is driving the demand for the product. Another factor likely to influence the market trend is the increasing focus on infection control in healthcare facilities. Medical exam table paper helps maintain a hygienic environment in healthcare facilities by providing a barrier between the patient and the exam table, thereby reducing the risk of cross-contamination. In terms of product type, the medical examination table paper market is segmented into crepe paper and smooth paper. Crepe paper holds a major share of the market owing to its ease of use and cost-effectiveness over smooth paper.
