The global Medical Examination Vehicle market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Medical examination vehicle is a professional vehicle that integrates medical diagnosis and vehicles. It has the functions of a mobile hospital, including basic diagnosis, auxiliary examination and other capabilities, but is limited by vehicle conditions and cannot carry out major surgeries. Therefore, the main function of the medical examination vehicle is to conduct preliminary treatment and preliminary diagnosis of the wounded and sick at the scene, and to transfer the sick and wounded to an environment more suitable for treatment. In addition, the design of medical inspection vehicles needs to consider factors such as the vehicle's power, safety, comfort, durability, and the integration capabilities of on-board diagnostic equipment. At the same time, the use environment of vehicle-mounted medical equipment is often complex and harsh, so there are extremely high requirements for the reliability of the equipment. In general, the medical examination vehicle is one of the solutions for mobile medical care, which can perform preliminary treatment and preliminary diagnosis of the wounded and sick at the scene, and help transfer the sick and wounded to an environment more suitable for treatment.
