According to our (Global Info Research) latest study, the global Medical Glove Packaging Machine market size was valued at US\$ 141 million in 2025 and is forecast to a readjusted size of US\$ 235 million by 2032 with a CAGR of 7.6% during review period.

Medical Glove Packaging Machine refers to a specialized packaging machine or integrated packaging line used for medical gloves, including surgical gloves, examination gloves, nitrile gloves, latex gloves and other disposable medical gloves. It is designed to complete key packaging steps such as glove feeding, folding, counting, stacking, pouch forming, sealing, inner wallet packing, inner box packing, cartoning and end-of-line case packing. For sterile surgical gloves, the equipment must support stable sealing, low-contamination handling and packaging formats suitable for subsequent sterilization or sterile barrier protection. Therefore, it is different from ordinary consumer glove packaging equipment and is more closely linked to medical packaging validation, cleanliness, sealing integrity and automated quality control.

In 2025, global sales of Medical Glove Packaging Machine reached approximately 1,125 units, with an average global market price of around US\$ 122 K/unit. Production capacity varies significantly among manufacturers, with gross profit margins ranging from approximately 25% to 50%.
