Abstracts

Medical Grade N95 and KN95 Respirator Mask is a particulate-filtering facepiece respirator that meets the U.S. National Institute for Occupational Safety and Health (NIOSH) N95 classification of air filtration. A properly worn N95 respirator can filter out up to 95% of particles in the air, thanks to its tight fit and synthetic material, which is made up of a web of tiny fibers charged with electrostatic energy. KN95 masks, which are the Chinese equivalents of N95s, are meant to meet the same filtration standard.
