The use of polyurethane materials in medical dressings benefits from their breathability, waterproofness and comfort. Polyurethane dressings are widely used in wound care, burn treatment and wound management. Their breathability allows oxygen to pass through while blocking water and bacteria, reducing the risk of infection and promoting wound healing. In addition, the softness of polyurethane dressings allows them to fit the skin comfortably without causing irritation or discomfort. Depending on the type of wound, the absorbency of polyurethane dressings can also be adjusted to meet the needs of various exudate levels.
